## **Sustainable Residential Interiors now has a Webinar!**

Associates III and WileyCPE.com Teamed up for a Continuing Professional Education Course

(Denver, CO) November, 2009 – Associates III and WileyCPE have turned their innovative book, *Sustainable Residential Interiors*, into an online course designed to make your educational experience easy and satisfying.

### Course Description:

Heightened public awareness of environmental issues and, more directly, of personal health issues within the home have made sustainability and environmental consciousness increasingly important to designers of residential interiors. This course provides designers with the necessary information and tools they need to help them integrate environmentally responsible design into their practices. Taking a practical, hands-on approach, this accessible and easy-to-understand course gives professionals the sustainable guidelines they need to employ in the field of residential interior design, and explains how to apply them.
